

# Analytics-Based Healthcare Solutions

**Accountable Care Organizations (ACOs)** require the right information and insights to reach the appropriate stakeholders at optimal times to make patient care more efficient, effective and less costly. This coordination needs to occur across the continuum of care to fill gaps and eliminate redundancy involved in care delivery. Our ACO Solutions Toolkit helps reduce costs and improve quality to maximize shared savings by:

- ▶ Revealing clinical insights to guide the most effective form of interventions
- ▶ Ensuring care plan compliance through patient engagement
- ▶ Improving situational awareness and decision support
- ▶ Realizing the goal of value-based healthcare delivery
- ▶ Offering advisory services to include economic justification, impact assessments, feasibility studies and cost-benefit analyses
- ▶ Activate patients for greater adherence through improved education and personal health coaching

**Value-added Services**

- Clinical Data Integration
- Architecture Assessment
- Data Management
- Business Intelligence
- Advanced Analytics

## CORE CAPABILITIES

### Population Analytics Platform

*Driving improved outcomes for patient populations*

- ▶ Identify and prioritize high risk patients
- ▶ Perform risk stratification and patient segmentation
- ▶ Develop risk-adjusted cost baseline prediction model

### Care Coordination Platform

*Directing care providers' efforts*

- ▶ Generate care plan reports and alerts
- ▶ Integrate care coordination workflows
- ▶ Optimize care transition planning
- ▶ Monitor care plan adherence

### Patient Activation Platform

*Engaging patients in their own care*

- ▶ Deliver customized patient education and care plans
- ▶ Define tailored wellness programs to promote healthy lifestyles
- ▶ Enable information sharing and communications across patient-defined Circle of Care
- ▶ Monitor health status and biometrics via wearable devices
- ▶ Deliver health coaching directly to mobile devices
